## **Collaborative research with University of Oldenburg initiated**

Frontier Labs signed a collaborative research agreement with the research group of Dr. Barbara Scholz-Böttcher of the Carl von Ossietzky University of Oldenburg, Germany on March 1, 2020, for joint research and development of analysis software and methods for microplastics using pyrolysis GC/MS.

Dr. Barbara Scholz-Böttcher's group interest lies in the following areas:

- Analysis of microplastics and additives in marine sediments
- Standardization of microplastic analyses in European waters
- Analysis of microplastics and additives in fish tissues
